MxPro

Mirrored / Brushed Stainless Steel Finishes

The MxPro 4 and MxPro 5 series control panels can be supplied with a brushed or mirrored stainless steel door, along with a matching semi-flushing bezel, to give a high quality finish to any installation.

A large range of doors and bezels are available, ensuring that your installation meets the highest standards in both image and flexibility.

By offering a large range of tailor-made metal work finishes, the customer plays a major part in specifying exactly how the end product should look and feel.

The high quality MxPro 5 Stainless Steel finish is "grain matched" to ensure both door and bezel grain patterns run in the same direction, offering a consistent look to the installed end-product.
