

# Agrippa sound activated door closer

# AGRIPPA

**DUAL  
MODE**

The Agrippa fire door closer is fitted in place of a traditional door closer to hold the fire door open in any position, whilst ensuring the door will close in the event of a fire. Agrippa is a 'free-swing' device which makes heavy fire doors light and easy to move.

Dual mode - Install the closer straight from the box or programme the device to listen and learn the sound of your fire alarm once installed.

## How does it work?

1

The Agrippa door closer is battery powered and wire-free. The device is installed at the top of the door.

2

Using 'listen and learn' technology, the device learns the sound of the building's fire alarm.

3

The Agrippa door closer recognises the fire alarm and automatically releases the door, protecting the building.

## Features

- Battery powered and wire-free
- Dual mode: Ready to protect, Ready to learn
- Fail safe, closing the door upon battery failure
- LED display and low battery warning
- Daily timed release option to close the fire door at night
- Red button on unit to manually close the fire door
- Acoustically listens and learns the sound of your specific fire alarm

## Benefits

- Recognised by UK Fire and Rescue Services and the London Fire Brigade
- Eases access and improves ventilation
