Discount Fire Supplies Offer Free Upgrade to Twinflex Pro Fire Alarm Panel

In line with the recent changes to the Construction Product Regulations, Discount Fire Supplies are offering their customers a free upgrade to the Pro versions of the popular Twinflex fire alarm panels from Fike.

Changes to the Construction Product Regulations (CPR) mean that it is now mandatory for manufacturers to apply CE marking to any of their products which are covered by a harmonised European standard (hEN) or European Technical Assessment (ETA) where previously, under the Construction Product Directive, application of the CE mark was voluntary.

Although these changes do not apply to products manufactured before the 1st July 2013 and such products do not need to be removed from the market Discount Fire Supplies are offering their customers the chance to purchase the Twinflex Pro 2 Zone and the Twinflex Pro 4 Zone fire alarm panels at the same price as the standard Twinflex equivalent.

The Twinflex Pro is an analogue non-addressable panel using a conventional cabling format which is capable of running up to 32 devices per zone. Devices communicating with the panel do so via the Twinflex protocol. The intelligent 2-wire control panel recognises the difference between manual call points and smoke detectors and also monitors each fire zone for detector head removal, open or short circuits, faults with devices and end-of-line faults. The Twinflex Pro panel has a built in LCD display and keypad for quick configuration with event log and allows zones to be individually labelled. The unit also has an integral power supply that can keep the panel on standby for up to 72 hours in the event of mains power failure.

The Twinflex Pro fire alarm panel is LPCB-Approved and complies to the changes in Construction Product Regulations.

The discount has already been applied to the Twinflex Pro 2 Zone and the Twinflex Pro 4 Zone, creating a saving of over %, so all the customer needs to do is add the desired Twinflex Pro panel to their basket and head to the checkout. The offer is set to run until the 31st July and will return to original pricing on the 1st August 2013. Standard Twinflex panels are still available to buy at their original price while stocks last.

About Discount Fire Supplies:

[Discount Fire Supplies](#) is an online retailer of Fire Alarms and LED Emergency Lighting aiming to become the UK's premier online fire alarm supplier. Their large stock-holding and good relationships with major manufacturers allows them to be competitive on price and choice and offer same day dispatch on all orders placed before 2.30pm.
