## Discount Fire Supplies Introduce A New Range Of Marine Fire Detectors

***Discountfiresupplies.co.uk have added a new selection of marine fire detectors, including an optical smoke detector, a multisensor detector and heat detectors, to their fire detector range.***

Discount Fire Supplies, retailers of Fire Alarm Systems and LED Emergency Lighting, have recently added a selection of new products to their fire detection range. These new detectors are from Apollo and are all approved for use in marine environments. The detectors operate in the same way and carry the same approvals as standard detectors but are subject to additional approval tests specific to the marine environment.

Orbis Marine Fire Detectors offer a strong range of features designed to save time, enhance reliability and reduce false alarms within the marine and offshore environment, making use of features such as DirtAlert, a feature that warns engineers that detectors need maintenance, and FastTest, a testing procedure that takes just four seconds.

The marine fire detectors that Discount Fire Supplies are now stocking include:

- The Orbis Marine Heat Detector (£12.95 +VAT): The Orbis Marine Heat Detector uses a single thermistor to sense the temperature around the detector. We have 6 heat detector options available to cover a range of different operating conditions.
- The Orbis Marine Optical Smoke Detector (£19.95 +VAT): The optical smoke detector operates on the well established light scatter principle and utilises advanced sensing technology to eliminate the risk of false alarms.
- The Orbis Marine Multisensor Detector (£24.50 +VAT): This detector benefits from the same false alarm reduction technology as the optical smoke detector but is enhanced by the addition of a thermal sensing element.
- The Marine Series 65 Mounted UV Flame Detector (£412.80 +VAT): This UV flame detector is designed to protect indoor areas where flaming fires may be expected. The UV detector even responds to flames with no flicker and is only sensitive to UV radiation emitted by flames during combustion.

Discount Fire Supplies also have a range of mounting options available, including the Orbis Marine TimeSaver base designed to allow a simple mounting procedure for all of the Orbis Marine detectors.

A spokesperson at Discount Fire supplies says, "We are often contacted by customers who request marine approved detectors, so we thought it was about time that we added some to our website. We already carry a wide range of fire detectors and are happy that we are able to extend our range even further, catering for all the needs of our customers."

**About Discount Fire Supplies:**

[Discount Fire Supplies](#) is an online retailer of Fire Alarms and LED Emergency Lighting and aims to become the UK's premier fire alarm supplier. They have a large stock-holding and good relationships with all major manufacturers allowing them to be competitive on price and choice. All enquiries can be directed to Tariq El-Hoss on 01792 452 700 or [info@discountfiresupplies.co.uk](mailto:info@discountfiresupplies.co.uk).
